Wall Street, New York City; Cash Capital, All Paid UP, of \$200.000; Surplus upwards of \$225,000; all securely invested according to the laws of the State; insures respectable parties against disasters by fire, on Merchandise, Household Furniture, Buildings, and the better class of risks generally, at the lowest rates consistent with the security of its policy holders and the conservative character of its management. The business of the company is conducted

on the Participation Plan, so successfully pursued by it for several years past, by which seventy-five per cent of the profits, instead of being withdrawn from the company in dividends to stockholders, are divided annually to the customers, in Scrip, bearing interest, according to the conditions on its policies; and the fund represented by said scrip is safely invested and held for the increased security of its policy holders, and the protection of the capital; thus, those who furnish the business and pay the premiums derive the largest share of the profits. When the accumulations of the "scrip fund" shall exceed the sum of five hundred thousand dollars the excess will be applied to pay off the scrip in cash, in the order of its issue; all this without the least liability on the part of the policy holders. The liberal and prompt adjustment of claims for loss, when fair and square, is a specialty with this company. This company does not write on the bazards of river, lake, or Inland navigation, confining itself strictly to a legitimate fire insurance business. Asher Taylor, President: Henry P. MEDFORD BRANCH RAILROAD.

Trains run to and from Medford, a distance of five miles, eight times a day each way. Fare 15 cents. 8 Package Tickets for \$1. Season Tickets, \$56 a year. Time, 15 minutes. This is a beautiful village, and a desirable place for summer residences.

ADVANTAGES OF A RESIDENCE ON THIS ROUTE.

Somerville, Medford, Malden, Melrose, South Reading, and Reading, towns within the range of the special as well as the longer trains, possess many advantages for country residences, either through the warm season or the whole year, not exceeded by those of any other towns in the vicinity of Boston. The cheapness of the fare, the number of trains, both early and late, in connection with the convenient deposition, render this railroad a desirable channel of intercourse between the city and country. That the advantages of these places are appreciated, is evident from the increasing demand for residences on this route, the demand for house lots, and the steady rise in the value of the land.

This line has introduced two new Railway Carriages on the European plan, which combines the greatest quiet and comfort to all travelling in parties or with families. They are run on the Newport trains.

NEWPORT

Has been connected with Boston by Railroad within the past year, trains running through to and from Boston twice each way daily. Its fine sea air and varied scenery has rendered it one of the most celebrated watering places in New England.

SCENERY.

It cannot be denied that the scenery on every section of this route is unsurpassed. The surface of the country for the first ten miles is beautifully variegated, presenting a continual succession of picturesque views of the country, the city, and the sea. Its hill-tops and valleys are decked with spleudid dwellings and tasteful cottages, and nowhere can be found the union of town and country more complete.

Passengers by this route can take the 4.30 P. M., Express Train, and arrive in Newport 50 minutes before the Steamboat Train, giving time to secure State-Rooms, and make other preparations for the passage. This line has a decided advantage over all others, being much less of Railroad—only 72 miles—occupying only two hours and one half arriving at.

You then go on board one of the elegant and commodious Steamers,—suppers being served to all who wish, soon after getting on board. You have a good night's rest, and arrive in New York early the foilowing morning, refreshed and ready for the duties of the day, as much as though you had remained at your own homes. This is admitted by all as the most desirable route, for comfort and ease, between Boston and New York.

A large assortment of best patterns from which to select to meet the requirements of each case. IMPORTANT TO SHIP OWNERS.

HEBARD'S BINNACLE OIL.

We claim this Oil as one of the most important discoveries of any age. It is harmless and safe as Sperm Oil, as it is perfectly unexplosive, which at once renders it the most valuable and desirable production ever presented. It is without a rival as a

BINNACLE AND TOP LIGHT

for vessels while at sea. It will not go out (if the lanterns are properly ventilated) during the most violent motion of the vessel in storms.

It will keep in any climate, improve with age, and remain perfectly limpid in the coldest latitude. It may be stowed anywhere on shipboard without danger to life, ship, or cargo. It is, therefore, of infinite value not only to shipowners, but to underwriters and crews. No ship should go to sea without it, as it is both safe and reliable in heat or cold.

Below we give a few of the many testimonials of those that are using it. The above Oil, and tubes to go with it, may be had, wholesale and retail, of

TESTIMONIALS.

Office of the Boston, Norfolk, and Baltimore Steamship Co., Boston, March 30th, 1866.

Messrs. B. F. HEBARD & SON.

Gentlemen, — This is to certify that I have been using your Signal and Binnacle Oil for some time, on board the steamship "Geo. Arnold," and find it to be the cheapest oil, and giving the best light, of any I have ever used. Yours respectfully,

S. HOWES,

Captain of Steamship "Geo. Appold."

Office of the Neptune Line of Steamers, BOSTON, March 31, 1866.

Messrs. B. F. Hebard & Son.

Gentlemen, — This is to certify that I have used your Signal and Binnacle Oil for more than six months, and I can truly say, I never had such good lights before using your oil, as it remains perfectly limpid during the coldest weather, and I consider it perfectly safe under all circumstances.

Yours respectfully, C. G. BAKER,

Captain of Steamship "Neptune."

PORTLAND, April 2, 1866.

Messrs. B. F. Hebard & Son.

Sirs,—This may certify that we have used your
Binnacle Oil for our signal lights only, during the
winter, and have found it the best for that purpose we
have ever used, as it gives a better light with less
trouble. I have no hesitation in recommending it to
others for that purpose as the best oil we have ever
used.

Very respectfully Yours,

JNO. J. LISCOMB,

Master of Steamer "Montreal."

BOSTON, April 4, 1866.

Boston, April 4, 1866.

Sirs, — This may certify that I have used your Binnacle Oil for our signal lights for some time, and have found it the best for that purpose I have ever used, as it gives a better light with less trouble and no crust to wicks; and I have no hesitation in recommending it to others for that purpose as the best oil in use.

Steamer "Nereus," of Neptune Steamship Line to New York and Boston.

Office of the Boston, Norfolk, and Baltimore Steamship Co., Boston, April 6, 1866. Messrs, B. F. Hebard & Son.

Gents, — Having used your Signal Oil for about ten months, I can recommend it as the best oil for that purpose I have ever used.

Respectfully yours, W. A. HALLET, Master Steamship "Wm. Kennedy."

BOSTON, April 6, 1866.

Messrs. B. F. HEBARD & Son,

Office of Pitcher, Fuller & Co., BOSTON, April, 1866.

Messrs. B. F. HEBARD & Son,

This is to certify that we have used Hebard's

AMERICAN MACHINE

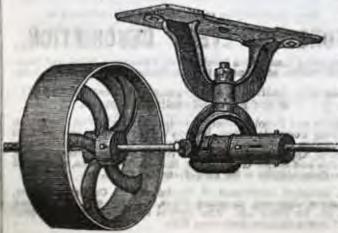

MACHINISTS.

KINGSTON STREET,

BOSTON.

Shafting, Pulleys and Hangers, Hand Lathes, Chucks, Slide Rests, and Belting, on hand and manufactured to order.

The above cut represents a first-class Lathe, with Nason's Patent Screw-chasing Apparatus attached.

N.B.— The American Tool and Machine Co. are the ONLY authorized manufacturers and venders in the United States of the above patented apparatus.

The lathe is particularly calculated for the manufacture of Steam and Gas Fittings. It is arranged to be used for turning, boring straight or taper-holes, boring cocks, facing plain surfaces, and screw-chasing.

This section of Shaft, Coupling, and Hanger, here represented, requires no explanation; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box which adjusts itself to the shaft, and we guarantee it to run six months without re-oiling, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

Marine, Stationary, Portable, Pile-Driving and Hoisting ENGINES. STEAM

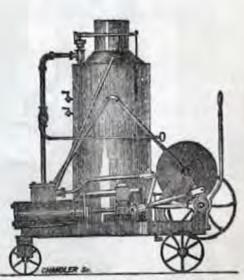

We would call the attention of the public to our IMPROVED PORTABLE STEAM ENGINE, in which all the working parts of the Engine are built on an iron frame (like a common Stationary Engine), thus avoiding the heat from the boiler to the working parts of the Engine, and the strain on the machinery caused by the expansion of the boiler; making both Engine and Boiler more durable than the usual style of Portable Engines.

These Engines are designed for all purposes where Stationary Engines could be used, and for loading and unloading vessels, Pile-Driving, small Steamboats, and Mining purposes.

They do not require any brick-work, and are ready for operation on delivery. The Boilers are warranted

to carry 100 lbs. per inch.

Portable Engine, Upright Boiler. From 4 to 12 Horse Power.

Pile-Driving Engine.

We use a Patent Regulator-Valve movement on our Stationary Engines, which, for economy and perfect

regulating, is not surpassed.

Having erected a new and commodious Shop, we are prepared to make SHAFTING, PULLEYS, SAWMILL, MINING AND PUMPING MACHINERY, and all kinds of MILL-WORK, with dispatch.

We would particularly call the attention of the public to our PORTABLE ENGINES, which we are prepared to make from five to fifty horse-power, for Pile-Driving, Pumping, Hoisting, Discharging and Loading Vessels, running Saw Mills or Machinery of any description, adapted to burn either coal or wood.

These Engines are peculiarly adapted to places where there are no brick, tools, or other conveniences for setting a boiler or engine, being ready for operation on delivery. For discharging coal, they are the most expeditious and economical of anything used for that purpose. These Machines may be seen in operation in all the large cities in the United States and the Canadas.

AMERICAN TABLET COMPANY, SOLE AGENTS IN NEW ENGLAND FOR

For use in Schools, Nurseries, and all other places where a blackboard is needed.

These blackboards are made of wood, coated with MUNGER'S EUREKA LIQUID SLATING, and secured in a frame like a school slate: they are equal in every essential quality to the best slabs of slate, and superior to

them in color and the smoothness of the surface.

For application to walls in Schoolhouses, this slating is too well known to need comment. It has stood the the test of s. VEN YEARS' constant use, and during the last year, in New England alone, has been applied to over Seventy-five thousand square feet of surface, and in not a single instance has it falled to give entire satisfaction. We have several men constantly employed in applying the slating to old and new blackboards, and every foot of surface is warranted.

We have a large file of testimonials at our office, from which we quote the following:—

SOUTH BOSTON, May 3, 1865. We have used the Eureka Liquid Slating upon all our blackboards since September, 1851; and I do not he state to say that it is superior to the best slabs of slate.

C. GOODWIN CLARK,

Master Bigelow Grammar School.

Boston, May 1, 1865. I am of the opinion, that the Eureka Liquid Slating will always give satisfaction when properly applied, JOHN D. PHILBRICK, Supt. Public Schools.

We have never seen better boards than these. surface is fine, soft, and smooth; the color a dead black, with no reflection, so that a mark can be seen at any angle. Your assurance that, after a few weeks'

use, they would erare with perfect ease, is fully verified. Mowry & GOFF.

English and Classical High School, Providence, R. I.

I know of no inducement that would influence me to have your slating removed from our blackboards, and return to the former painted surface.

E. B. JENNINGS, Bartlett High School, New London, Conn.

I have had the Eureka Liquid Slating in constant use in my schoolroom for five years, and do not hesitate to say that it deserves the best things that can be said of it, without qualification or abatement.

OF OUR WOOD AND FUEL ALL SEASONED UNDER COVER.

We, the undersigned, do certify that we have been using Daniel's Patent Granular Fuel, manufactured and sold by WILLARD M. HALL, of this city: that we find it a very superior article of fuel, more convenient to use than split wood or charcoal, either as a kindling material or as a summer fuel where protracted heat is objectionable. There are no disadvantages astendant on its use; much time and labor is saved by using this fuel. We freely and cordially recommend its use to all householders, feeling assured experience will corroborate its advantages as above.

ROXBURY

G. H. Benedict, Warren Street. Mrs. Mayhew, Guild Row.

DEAR SIR:—I have used your Granular Fuel for some time past, and I consider it the best thing for kindling I have ever used. I consider it more economical to use than either split wood, charcoal, or other kindlings, and have no hesitation in recommending it to those who are in want of an article for kindling which is free from dirt of every description.

I have no doubt that your fuel shall only have to be seen to be appreciated. Yours respectfully, To WILLARD M. HALL, Esq.

JAN. 8, 1861.

DEAR SIR:—The result from the use of your Granular Fuel as compared with cord wood or charcoal, I find to be one-third less cost. In point of cleanliness and convenience, it is far preferable. It requires no other than itself to kindle. It is equally useful in families as for hotels, and at the hands of unprejudiced persons, will be, I have no doubt, generally acknowledged.

To W. M. HALL, Esq.

Proprietor Worcester Exch. Hotel, 27 Albany Street, Boston.

PARKS HOUSE.

187 WASHINGTON STREET.

The attention of Gentlemen doing business "down town," and who are unable to dine at their homes, is respectfully called to the peculiar advantages offered by the above well-known Hotel, as a desirable place for them to obtain a Good Dinner, and at a low rate.

Its close proximity to Franklin, Milk, Devonshire, Congress Sts., and other business localities; its retired location, free from the noise and bustle of the street, and the moderate price at which the Dinner Tickets, by the dozen are placed (it being the intention always to set a first-class table), together with the hours during which the same is served, are among the inducements offered to Business Gentlemen and the Public generally, to make the "Parks House" their Dining Resort.

Dinner Tickets, \$7.00 per doz. (being but 58 cts. each dinner). Single Dinners, 75 cts. Dinner served from 12 to 3. Transient Board per day (including meals and room), \$3.00. Permanent Board (Rooms and Meals), on favorable terms.

ROBINSON'S PATENT

For Churches, Schoolrooms, Prisons, Stables, Factories and Workshops, Drying and Dressing Rooms, &c.

Founded on the only correct theory of Ventilation,

Has been applied in many hundreds of cases with universal success. On page 37, of the Boston School Report

for 1863, see this:

"In the nearly or quite unanimous opinion and experience of the members of the School Board, the system of ventilation represented by Robinson's Instruments is the best now in the market. Their judgment, in this respect, is based not upon mere theory, but on positive, indisputable facts. In the Bowditch Grammar School House, and in the Primary School-House on Harrison Avenue, the success of these ventilators has been complete and entirely satisfactory, and CAN NOT BE QUESTIONED."

LUTHER ROBINSON, 46 CONGRESS ST., BOSTON.

ROOFING AND PAINTING.

Kingman Discovery in Roofing (an improved process of imbedding burlaps in paint), has received the indorsement of the first mechanics in the country. A diploma has been granted by all the "Fairs" where presented. The "Mechanics' Fair" in Boston, for 1865 granted a diploma in competition with the principal roofings of the country

It is the only Roofing which veneers itself to the surface covered so firmly that baking in an oven or boiling in water for hours has no effect upon it.

It is adapted for all descriptions of roofs. It is extensively used and pronounced the best yet devised for

DECKS, CARS, LOCOMOTIVES, CABS, BRIDGES, & BUILDINGS.

KINGMAN DISCOVERY IN PAINTING

Will save one cost of applying paint, and furnish a more enduring coat.

Orders for Paints of all colors promptly filled at a low price, and directions furnished for applying by the Patent process.

(SEE INSURANCE COMPANIES HAVING AGENCIES IN BOSTON.)

The ÆTNA LIFE INSURANCE COMPANY, of Hartford, Conn., was chartered in 1819 as a part of the old Ætna (Fire) Insurance Company, with a Perpetual Charter; but no life business was done until 1850. In 1853 the life fund was separated from the fire fund, and made a distinct corporation with the same directors, managers, and stockholders as before. The business was done entirely on the stock plan until Sept., 1861, when their mutual plan was adopted, giving to the members all the benefits of dividends, and none of the risks asked to mutual insurance. risks usual to mutual insurance.

Since then the Ætua has met with such unparalleled success as to command the admiration of the whole insurance world, and place it among the first Life Institutions of the nation.

Its receipts in 1862 were \$92,204.60.

" 1865 " 1,683,039.57.

Showing that it has increased its business in the three years, MORE THAN EIGHTEEN TIMES.

The number of policies issued in 1862 was 514.

""" 1865 "8,809.

"" " " " the year ending June 1st, 1866, was 11,051.

And it is now issuing more than 1000 policies, and receiving more than

A QUARTER OF A MILLION OF DOLLARS MONTHLY.

This makes it perfectly safe to estimate that the receipts of 1866 will double those of 1865.

The Ætna's yearly dividends, in cash or applied to pay credit given, but not in scrip, PAID after two full rears, insurance on the ordinary life plan, is as large as that paid by any company, and better than that paid by most.

It never paid less than 40 per cent., and is now paying 50 per cent.

Its careful management is seen in its selections of lives (see Mass. Life Reports for 1866): On 342,805 years of life exposed during 1865, the loss was less than one third of one per cent.

The Ætna is progressive, and has

ALL THE MODERN IMPROVEMENTS

that are really of any value to the insured.

It issues Life, Ten Year Nonforfeiting Life, Term, Nonforfeiting Endowment Policies and

ANNUITIES.

ANNUITIES.

The Endowment Nonforfeitable Plan pays the insured a premium to live and receive the money invested on attaining a specified age, and is doing more to popularize Life Insurance than any feature yet introduced. This class of insurance is increasing three and a half times faster than any other, and is becoming the most popular, as well as the safest mode of investment.

Call at their office, 27 State street, for a circular before insuring.

The agents will treat you courteously, and are always ready to answer questions relating to insurance, or give any desired information on the subject.

This old and popular Company is one of the best for Agents to work for, and all persons who desire to act as Life Insurance Agents will consult their own interests in calling on us before making engagements elsewhere. Of Agents, Hon. Elizur Wright, in his Report for 1863, says: "Among the honorable workers in the civilized world, to whom the public as well as the insured will die indebted, we give faithful and successful life insurance agents a high place. It is hardly possible to believe that a life insurance agent can achieve any long-continued success without bringing into action some of the noblest qualities of a sterling man; and no field that we know of is more inviting to an ambition that would devote the best of talents to the benefit of society at large and individuals in particular."
